

LIMESTONE CENIA BEIGE

DESCRIPTION

A dolomitic sedimentary limestone recrystallized from metamorphosis. Due to its physical characteristics it is classified as marble.

It presents a color between brown and yellow with fossil inlays in lighter tones.

USE

A very versatile natural stone due to its technical characteristics, which makes it useful for both outdoor and indoor uses. It is suitable for horizontal and vertical surfaces with multiple finishing possibilities.

FORMATS

- Blocks
- Slabs
- Paving

FINISHES

- Bush-hammered
- Sandblasted
- Honed
- Brushed
- Flamed
- Polished
- Aged

TECHNICAL DATA

DENSITY	2690 Kg/m ³
POROSITY	0,3 %
COMPRESSIVE STRENGHT	173 MPa
FLEXURAL STRENGTH	8,7 MPa
WATER ABSORPTION	1%
ORGANIC MATERIAL	≤ 0,95%
